Comments:

The U S Forest Service has proven to have destroyed more vital habitat in Southeast Alaska than any other entity . For years the 450 million bf cut that was encouraged by the USFS , was a pariah to all who lived off of the forest .

Now it is 2019 and the USFS expects us to react to a plan without a map ! USFS is up to it's old agenda , which is to be used as a political tool for industry . As always the USFS will underfund habitat and restoration projects for the " Holy Grail " , the ability to rape more old growth off of the Tongass .

We ran a lodge in Southeast Alaska before going broke at it . I found the Forest Service to be inconsistent to work with . I wouldn't trust the agency to manage anything into perpetuity , the agency is too political , bowing to the Murkowski's and the faded dream of an old growth timber economy in Southeast . Give it up , the science is against you . The politics are against you and the USFS has made a joke of the term " multiple Use "

It is time to shut down the old growth industry and rehabilitate the tens of thousands of acres that the agency has laid waste to over the last 75 years . The U S Forest Service has proven to be no friend or advocate for the multiple values the Tongass represents .
