Comments:

please, PLEASE, stop and consider the results of cutting this huge forest!! our Earth is already suffering from rising temperatures caused by all the forests that have already been cut. Trees are what we need to COMBAT global warming, and keep our animals, plants, AND us from dying.

PLEASE stop plans to cut the Tongass National Forest! There is NOTHING to be gained by destruction of the trees God has created to keep His Earth safe for all His creatures!

WHY would the Forest Service even think about leveling a forest? That's painful to hear.

Doris Smith
Hayesville NC
