Comments:

I would like to express my support for maintaining access to King Mountain for paragliding and hang-gliding activities. King Mountain is quite simply one of the best soaring sites in the US. It would be a major loss to the flying community if it were no longer accessible. There have been some precedents for excluding areas from wilderness designation (for example the Snow Mountain wilderness which we often fly in Northern California). I hope you will be able to consider a similar such easement for King Mountain.
