Comments:

This comment is in support of Option-A.

BoonDocker employs 20-40 people (seasonally), who build accessories for off-road, motorized recreational vehicles (snowmobiles and UTV's). Access is absolutely key for off-road recreationalists. Should this area be shut down, it would dramatically impact our business, and the livelihood of our owners and employees.

Additionally, the entire crew at BoonDocker enjoy outdoor recreation, especially on snowmobiles. We all have great experiences using public lands to recreate. Our children deserve the same access!

Please consider that closing this area down to snowboiling would come at a dramatic economic impact, not just to the Montana area, but to the surrounding communities, as well as communities like ours, that supply many parts and accessories for this industry.
