I am writing this letter in support of including 230,000 acres of roadless lands in the wilderness study area into a permanent Wilderness Area. I have enjoyed this area over my lifetime, I'm now 91 years old, and I hope it will be maintained as a wilderness area into the future.

I think it is imperative that we preserve a portion of our wildlands in their natural state for the enjoyment of future generations.

Sincerely,

  
M.E. Quenemoen
