Comments:

My name is Taylor Armstrong, local to Bozeman. I am in agreement with ALTERNATIVE D. I am of the belief that human interaction is responsible for the majority of ecosystem degradation. I am willing to sacrifice my recreation access in order to protect wildlife, resources, water quality, plant populations, etc. Although I do believe in "reciprocal conservation" - the philosophy that people care more about conserving areas that they have a personal gain from accessing/utilizing/hunting etc. I personally strongly agree with alternative D.

Thank you,

Taylor Armstrong
