Comments:

I am against opening up this land to development, of any form. These are the last, areas, that have been allotted to the birds and other animals, that live in the flat lands. It is nice to know that I will be able to visit that area with them still there. I want to think, that this country isn't about greed, and seeing what the ground or area can do to our pockets. Some spaces need to be left alone, for the future generations to come, so they can also see the beauty, and serenity, what God has provide for us. We are suppose to be the care taker of the animals and the lands, not to exploit it. We all need to rise up against the few (greedy), who want to take away from the rest of the people.
