i very much oppose the fs devastation of all our national land which is owned by 328 million people of this country. we need to save and protect this national land becaues no one else is at any time. with the sixth extinction of all wildlife it is also clear that we are devastating all ilfe on this planet except humans and we cannot exist in that fashion. devastatin of the old growth trees is wrong - completely wrong since they give us oxygen to breathe and do so many other wonderful things for humanity. the fs in fact gets the money from this. the people of this country dont get a cent from the devastation of the property they own. all they get is more taxation for work that teh fs doesnt do for environmental purposes. there is no environmental advantage from this plan. the fs acts as a devastating deplorable assault team on forests. please stop this attack on nature.
