Proposed Wilderness, I think we have enough wilderness now. We are a small state by population, so we have to use the means we have of making a living, which includes mining ,ranching, logging and tourism. By having more wilderness you take that out of the equation. I completely disagree with anymore wilderness in or around any drainage, this area has had mining, logging, ranching and tourism in its long history. I have been a property owner in that area for 52 years. I am getting older with disabilities, and would not be able to use the land if it was made into a wilderness. Please consider no more wilderness. I think it is totally wrong the way you are changing the definitions of the Wild and scenic rivers act to now include creeks . Thanks Ken Armstrong
