Comments:

I want my 2 cents in the voting bucket. I am totally against any more wilderness, you guys have already made a mess of our forest, I said our, the public, not yours, the forest service. It needs to be managed not hidden from the public. You have already locked me personally out of all the places I hunted as a kid, I've dealt with it but this time you are overstepping your authority. Public land is what it says and should stay that way.
