To whom it may concern, I am writing to express support for allowing continued access to King Mt. for the purpose of hang gliding. This site is known world wide as a premiere flying site from which many well known cross country flights have occurred during the last few decades. Hang gliding has become a valid and accomplished sport on the world stage in my view, as I have participated since 1975 and have watched it evolve. The sport has minimal environmental impact overall much unlike many other recreational activities and I see it remaining as such. Our flying community respectfully requests this to be able to continue in this beautiful area. Thank you, John Sillero (Master rated pilot #18983, United States Hang Gliding & Paragliding Asso.)
