Comments:

Please DO NOT rollback 2001 logging restrictions in the Tongass National Forest. I support Alternative #1 which maintains the Roadless Rule in Alaska.

The areas in Alaska that are still pristine are referred to as America's Amazon. They do not belong only to Alaskans, but to ALL Americans and, in fact, we are the stewards of the forest for the rest of the world. It is imperative to conserve these forests for future generations and for the health of the planet.
