Comments:

My name is Franchesca Bodnar and I live in Cleveland, Ohio. I don't currently reside near the forest but I think this forest is extremely important to protect!!!! Even though I live thousands of miles away I depend on this forest among other forests to help decrease greenhouse gases from the atmosphere. I would say that it's value is priceless since this is an old growth forest that we could never duplicate in our lifetime! I am writing a comment on the Alaska Roadless Rule DEIS because I am concerned with how the Rule and the proposed full exemption will impact my the status of the Tongass as a national and global treasure, the forest's ability to sequester carbon and mitigate climate change impacts, the conservation of resources for future generations the peace and solitude I find in nature.

Out of the alternatives described in the AKRR DEIS I support alternative 2: open up roadless. It is a workable compromise that allows for economic development and the protection of roadless characteristics. I depend on roadless areas in the Tongass National Forest for carbon sequestration and local climate change mitigation, keeping public lands wild for future generations. A full exemption does not protect these values, nor does it effectively balance economic development and conservation of roadless area characteristics. A full exemption from the Roadless Rule and increased logging and roadbuilding will negatively impact the Tongass and what I and many others use and depend on the forest to provide for us.

The Roadless areas on the Tongass that are especially important to me are those on or around all of the inventoried roadless areas on the Tongass. I want the roadless areas in these locations to stay in roadless status in any alternative selected by the Forest Service, and be managed to provide for the uses and activities I listed above. It is important to me that the T77 and the TNC conservation priority areas retain their roadless protections.

I do not support the Forest Services preferred alternative of a full exemption. A full exemption is not in the interests of Southeast Alaskans who live in and use the Tongass National Forest, because I'm not sure what you mean by full exemption. The State of Alaska says that a full exemption is needed for rural economic development opportunities. However, a full exemption would not help create more rural economic development opportunities, it would instead harm our existing rural economies that are based on the visitor industry and commercial fishing industry.

It would further harm rural economic opportunities because pursuing the same outdated economic model of old growth clearcut harvesting for export stifles innovation and possibility in other sectors, such as mariculture, sustainable young growth harvest, and rural agriculture. If the Forest Service wants to support rural economic development, they should improve and streamline existing permitting processes for important community projects rather than rehashing old conflicts.

I urge the Forest Service to prioritize the voices of Southeast Alaskans over those of our political representation and corporate interests. Choosing a full exemption will not create a long lasting, durable solution for roadless areas on the Tongass. It will only increase the legal challenges, uncertainty for businesses, and conflict on the Tongass going forward.
