Dear decision makers,

Although I am not a resident of Alaska, nor have I ever visited the great state of Alaska, I feel a kinship with the wilderness aspect of the state.

As a long time Idaho resident who has spent many years hiking, backpacking and enjoying many of Idaho's roadless and wilderness areas, I appreciate the unique and special character of areas that are roadless and undeveloped.

After reading through the information and proposals regarding changing the Alaska Roadless Rule designations, I would urge you to adopt Alternative Two (2) which protects current roadless areas and adds some new lands.

There are roads and development all over this country and so very precious few truly untouched and protected areas remain. I cannot condone adding more and cutting back on those roadless areas that currently exist.

Thank you for considering my request.

Alida Bockino
