ALTERNATIVE 1 IS DEMANDED

It would be appreciated if no exceptions were granted to alter the status of the National Forest. Instead of opening up new, untouched land to industry, commercial logging projects should be held to a higher standard of managing their existing land. We cannot afford to simply open up wilderness every time a dollar bill is waved in front of a politician. As the nation and world population increases, it is paramount to preserve and protect all available natural resources for future generations.
