KEEP YOUR GREEDY HANDS OFF OUR LANDS!!! Please leave our protected lands alone! The protections were enacted for good reasons, those reasons are even more valid today as well as the future! Why does the current administration/dictator feel the need to undo generations of good just for him and his wealthy few friends. Let OUR voices be heard! PROTECT the Tongass National Forest! There is NO need to use timber from this forest or others, I personally feel the job they do cleaning the air far outweighs any reason to cut them down. Plus the beauty of seeing them. Go to Oregon and see what deforestation looks like, it's not only sad but tourist and locals can't tell you it's economical downside. Of course lumber industry doesn't care about that once they make their profit they move on. Protected land mean just that! Protected for ALL generations! It's been working for years now STOP messing with what's working and fix real problems like health insurance for all!
