Title:

Comments:

I strongly object to any plans to open up the Tongas National Forest to road construction or logging. We need the maximum amount of trees to absorb carbon dioxide to reduce the impact of climate change.

Therefore, I demand that you totally reject all the alternatives other than Alternative 1. Alternative 1 takes no action and would leave all of Alaska under the 2001 Roadless Rule, including the Tongass National Forest.

Leave the forest alone. Accept the ruling of the scientists and not the timber merchants and the other organizations that just want quick profits regardless of the enormous damage that they are causing to the planet.
