Title:

Comments:

I hope you will take no action and leave in the Tongass under roadless area designation. This is a unique old growth forest, that has great value as an intact ecosystem, and would be greatly damaged by opening it up to clear cut logging. Having fished in Alaska, I know how important it is to water quality to have healthy forests. Additionally, I do not want my tax dollars subsidizing logging in this beautiful area. It is especially short-sighted, when we are facing drastic climate change and need MORE trees to absorb CO2, not less! Please put environmental health and well being first, and leave the Tongass as it is!
