Exempting the Tongass National Forest is illegal and corrupt.

Just as the forest service is putting this atrocious new rule out another disgusting thing comes out of the trump swamp "Richard Goeken, Interior's Deputy Solicitor for Parks and Wildlife and a Trump political appointee, has previously led efforts to log millions of board feet of centuries-old trees in the Tongass National Forest, revealing yet again the extent to which Interior's leadership team is rife with conflicts of interests and ties to industry."

This needs to be stopped! The Tongass National Forest is one of the last remaining ecologically intact areas in North America! NO ROADS FOR LOGGING PERIOD!!!!!!
