Title:

Comments:

Do not build roads in this area! Stop and think about the future. Any short term gain from logging is not equivalent from the long term gain of sustainable tourism, the jobs it provides, the habitat it saves and keeps healthy for generations to come.

I work for a company that sends hundreds of people through here each year for the very reason of seeing the pristine beauty of the area. They stop into villages like Kake and meet the people. Listen to the people of Kake and those of other communities.
