Title:

Comments:

I strongly believe it is in the best interests of the people of this great nation that the roadless rule remains in place, as described in Alternative 1. The natural wilderness in this country is shrinking and we must do our best to be stewards of the land so that future generations may also appreciate the splendor that are the wilds of Alaska. Do not let this area become subject to inevitable destruction that comes with development, nip it in the bud and keep Alaska wild.
