Comments:

Please keep the Tongass National Forest the way it is!! I OBJECT the exemption of the roadless rule along with plenty other of my friends who have experienced countless amazing memories of living and working in the wilderness of southeast Alaska. We already have climate change to worry about and more logging and mining will devastate this fragile ecosystem. The Tongass National Forest is one of the last wild gems on this earth and let's keep it that way for generations to come!
