Comments:

The Tongass Forest is a beautiful part of America. It is an outdoorsman's dream. Many of the trees are extremely old and part of our history. Now (with climate change - no matter what the administration says) is a time we should be planting trees and not cutting them down. The destruction of the trees will not make that much and they will be gone. They will not be back - they are irreplaceable.

Do not let Trump destroy the Tongass as he has destroyed Organ Pipe. It is not worth it.
