Title:

Comments:

This is the worst idea among the many that Donald Trump has come up with! With global warming at the top of the list of immediate environmental concerns, cutting down any of these trees would be a disaster and a travesty! By putting greed above the environment, our world has come to the brink of environmental disaster of a global temperature rise that will devastate the world as we know it. I cannot support this greedy policy of deforestation and I demand that USDA reject this move!
