Title:

Comments:

I have used FS roads and trails my entire life & only noticed distress, damage and misuse in the most recent years, and then only by Jeeps and 4 wheeled vehicles that disrespect land and use it when it's wet and or muddy. These users also seem to pollute more frequently. Perhaps because they use alcohol or drugs more readily? I. Am a mountain biker & also have dual-sport and trail cycles. I have respect for the land, always clean up after others, and would be happy to pay for the privilege of using these treasured areas!
