To All This May Concern:

PLEASE reflect upon previous years of votes and approvals by the majority of legislators, former presidents, indigenous people, Alaska residents, wildlife groups and the American public who want to protect and enjoy the natural state of Tongass and protect the wildlife who in turn protect the ecosystem of this beautiful wilderness, currently untouched by invasive roads and vehicles and the potential disruption to the people, the land, the wildlife, by drilling, fracking and mining. YOU CANNOT PUT A PRICE ON THE BEAUTY OF NATURE AND NATURAL RESOURCES OF OUR NATIONAL PARKS AND FORESTS! They were NEVER meant to be developed or to become sources of income for our government or for privatization! TONGASS belongs to the American people and the people of Alaska! NOT as a whim of the president to thank supporters with privatization! Look what has already happened in other states between logging and fracking for oil in other State and National Parks. This discussion has been stated publicly in news sources with references to the needed protection of ecosystems, as we feel the effects of Climate Change all over the world! We are feeling the changes now! We must stand united in protecting our public lands, so there are not abused but protected - and this includes our diminishing wildlife that helps to sustain the land and promote growth! This is a chain reaction situation, and the interference into Tongass is NOT well-meaning nor in the interest of the MAJORITY of people. PLEASE. No roads and no privatization. Thank you.
