Preserve the Tongass National Forest

Dear USDA Forest Service:

I'll keep this brief. I support Alternative #1, to preserve the Roadless Rule for the Tongass National Forest. Please keep this national treasure as it is, a wildland that supports the primary economies of tourism and fishing. Allowing lumbering and development would be an environmental disaster to our country and the Earth. There are far too many consequences for me to list here, and I am sure you are aware of them all.

Regards,

Stephen German
