Title:

Comments:

The published plans for logging 1200 acres per year ongoing are way too vague for the public to have an idea of what you are doing. No specific places, purposes, or environmental analysis. We must keep our forests healthy as they are the lungs of the world, which is endangered by global warming. True forest management is needed, but not destructive logging practices. How can we tell which you will be doing? We cannot simply trust you. I oppose this plan.
