Roadless Rule in Tongass National Forest

Hello,

I am writing in support of Alternative One regarding the Tongass National Forest. I wholeheartedly believe that it is wrong to allow renewed road building or logging in this old growth forest. The Forest is important for tourism in Alaska, aids the fight against the climate crisis by providing carbon sinks, and is a truly beautiful natural landscape. Allowing logging for short term capital gains is a short sighted sacrifice of something that can literally never be replaced. Please do not allow renewed logging and road building in Tongass National Forest.

Best,

Daniel Mephram
