Comments:

I mountain bike on Jake and Bull mountain, kayak often on the Chattooga river and hike around Grassy mountain and frequent other areas in the foothills. It is unconscionable that our state is considering taking action to destroy so much of this beautiful stretch of forest. You are here to protect our natural resources, not profit off it. I am shocked and ashamed that an entity of the Georgia government would even think of allowing such a project to implemented. I realize as a lay citizen, I have very few options to affect this decision. However I implore the state to reconsider. Give the public specific information on what you will be doing, where and when. That has been the precedent for years and should remain that way. Please remember why the forestry service was created. To manage and protect our nation's beautiful forested resources.
