Comments:

I am very concerned about the fact that the Foothills Landscape Project as currently formulated will not allow the public to utilize the established NEPA process at the time of site-specific locations for treatment are being established. The ecosystems of the Southern Appalachians are complex. Cutting trees in some areas can be relatively harmless while cutting trees in the wrong place can have devastating effects. Please fix the Foothills. Do not closeout the NEPA process before the public can know specifically where you plan to do the projects you want to do.
