HC6374

To Whom it May Concern:

I am writing to urge you to keep the federal Roadless Rule *intact* by taking a course of *no action*

The Tongass is worth more to Alaska in carbon storage than it ever would be as pulp logs or round log exports. Logging in Southeast Alaska has only ever been profitable when subsidized, and such subsidies are fiscally irresponsible in the current economic climate, or in any economic climate. The future of logging in Southeast Alaska is small-scale, artisan forest products, which would *not* new roads. Please leave the Rule as-is.

Regards, Thomasina Anderson
