Comments:

Our public lands are for public use and enjoyment. I firmly believe the public should retain a say in the use of public lands. No de-forestation, no unreasonable access restrictions. Save our treasures for our children and grandchildren. De-forested lands take 50yrs. or more to recover if, at ever. We have many endangered plant species within the Chattahoochee National Forest that should be protected and preserved. De-forestation of our national forest for profit..could leave us with an eye sore, a loss of a state treasure that very likely would never have the same diversity and beauty ever again.
