Comments:

I am concerned and would like to voice my opinion against proceeding with the current proposal. I grew up enjoying the nature and wildlife in the north Ga area and want to continue to enjoy it with my family as they grow up. I understand that some logging is needed and feel that this decision should be more open to public opinion. The proposal currently is too vague and for an unreasonably long time. It seems to give too much power and freedom to those wanting to log and build roads. I strongly feel that more details and restrictions should be provided and reviewed by the public. The lands belong to the public and all of its citizens should get to be represented and heard.

Thank you for listening to my statement.
