Comments:

I have hunted and fished in the Chattahoochee National Forest for over 25 years. I am in favor of anything that will improve the hunting and fishing there. I prefer Alternative 2, the Proposed Action to be taken. I oppose large areas of clear cutting as it takes so long to grow back. I know it takes the new growth from some thinning to provide browse for the deer and food for the turkeys. The proposal to save the large hemlocks from the insects to protect our trout population sounds good.
