Comments:

I strongly agree with the foothills landscape project. In order to see our wildlife return to vast numbers. It will not only help large game animals but will help birds such as the ruffled grouse. Look back at the 70s and 80s at how much game was in the mountains and also the hunters. People don't hunt in the mountains anymore due not seeing game as a whole whether it is deer or small game or grouse. I am thankful for the opportunity to voice my opinion on this awesome project and hope to see it come in the near future. I say again I STRONGLY agree with this project.
