Comments:

I'm in full support of this project and hope to see it come to pass but towns and union county need to be included. The wildlife population in these two counties has greatly decreased in recent years and needs help. The goals of this project are things that our wildlife are in great need of. The decrease in deer and turkey population in recent years is very disappointing and I hope to see something done in the counties listed as well as the two I listed that are not included as of now.
