Comments:

I absolutely oppose timbering our national forest for commercial profiteering, damaging the environment with pesticides and herbicides, using bulldozers , burning, etc. This desecration of publicly owned land is short sighted and will result in future generations being robbed of the enjoyment of this national treasure. We all own the Chattahoochee forest, not just whatever politicians happen to hold sway over the US Forest Service at any given moment in time. That commercial interests are pushing for this is deeply troubling. Lining pockets does not make for conscientious decision making. Please leave this beautiful national treasure alone!
