Comments:

I think the Forest Service plan for the Chattahoochee National Forest is foolish, and looks to be lining someone's pockets rather than preserving our forest lands. The Forest Service should provide full access to the lands to the public, but do not alter or destroy the lands as is being proposed. Let the timber grow. Let natural fires run their course (within limits). Allow individuals to gather firewood, and plants within limits, camping, hiking, hunting and fishing of course should always be encouraged. But do NOT allow Commercial logging!
