Title:

Comments:

I am a resident of North Habersham County in Georgia and a National Forest parcel borders my property. My husband and I want the forest to be preserved in it's natural state as a buffer against deforestation and agricultural land. The survival of our planet is at dire risk and we depend on folks in positions of power to protect us by protecting our forest. The last hope of resolving climate change is in the hands of those with decision making power to do the right thing for our planet. Help us!
