Chattahoochee- Foothills Landscape Project

Please do not allow the forest to be cut down. My family and I love to go out to these mountains all the time. There is no reason to cut down already established habitats to promote others. It will only cause unnecessary and irreparable damage to our forest. The people allowing this to happen are those who will get a pretty penny in their pocket. It is only the lumber companies who will profit from all of this, not the ecosystems.

Concerned citizen,

Cecilia Shivet
