Foothills Landscape Project #52509

Ms. Israel,

I am an avid cyclist and hiker and enjoy spending time on the Jake and Bull Mountain trail system. It is a unique system of trails that cannot be found in any other location in Georgia. There are similar trails but the length of trails provides ample opportunity for a multitude of activities including, as I'm sure you are aware, cycling, hiking and horse-back riding. The proximity to a large population means these trails are used heavily and will be sorely missed by many people. Moreover, because there are camping opportunities that opens up another demographic of people who may like to camp and even fish. It would be a blow to the area of North Georgia and beyond to jeopardize these trails. I have much more to say but wanted to be brief. These trails are surely beloved by so many diverse folks.

Thank you,

Jason Turner (Cumming, Ga)
