Comments:

all directives need to be given to the public on the federal register notice to receive comment from the entire usa citizenry. we are to have govt by the people for the people, not some sneaky back door operation that just lets those in the industry do their typical sneaky work like aphis and its wildlife killing agenda.

all directives should be exposed to the entire american community, not just profiteers in an industry. we have seen the sneakiness of federal agencies increase where the american public writes in in the millions and still we have wild horses being killed by blm usda because of robber baron cattle ranchers and all wildlife being killed by sneaky calls from ag profiteers. it is time we open up this agribusiness so that all of us can comment on the poison plans and poisoned farm animals we see daily! we are sick of the poison way that the agribusiness industry is working these days, poisoning the american people so they don't live as long as they used to. they are killing us earlier in life since 2017 in america. we are dying from poison food.
