Title:

Comments:

I have been flying paragliders and hanggliders for over 15 years. Having flown in the United States and places like Indonesia, Nepal, S. Korea, Namibia, Botswana, Ukraine, Thailand, Italy and many others, King Mountain is a world class flying site that should be promoted and developed as such. What an incredible resource for the local community to produce and revenue for public use as well as promote something so beautiful and unique as non-motorized flying! Please do whatever is necessary to not just keep this site open, but to promote and improve it as the premier flying destination that it is!
