Comments:

I am all in favor of maintaining the abundant trails of the North River Ranger District of the George Washington National Forest and also the construction of new trails. I fully support the new construction on Narrowback Mountain and look forward to accessing it from the Wolf Ridge parking area along the Tillman Rd. corridor. The trails of the North River Ranger District dramatically add to the quality of my personal life and to lives of many others who frequently visit our area! More trails that connect key areas of our ranger district have, and will continue to, add great value to every visit to the National Forest!!
