Comments:

I travel to GWNF a dozen times each summer to mountain bike and it would be great to connect Wolf to narrowback so that you could easily park at the wolf lot and ride on trails that are more friendly than the other more back country options in the forest. I like to ride with my wife and son and we prefer to stay off roads, and even the traffic on the dirt roads is great to avoid. Thanks for everyone's work to further develop this valuable community resource.
