Comments:

I am writing today to voice support for the proposed trail re-alignment on the north-western section of Narrowback. The proposal decommissions a seldom-used trail that has erosion issues with a newer, longer trail that is built on sustainable grades. The new trail also exits to the road at an existing parking lot. This makes access easier. It also allows extended loops to be made between the Narrowback trails and Wolf Ridge trail. To do so currently, the hiker/cyclist has to transit a few miles of Tillman Road (not horrible, but doing so on trail would be so much better).
