Comments:

Nationwide the pandemic has shown the need for increased access to public spaces and trails. There has been a large increase of beginner and intermediate trail users. The relocation of the Narrowback trail is a necessary step forward to improve access to these user groups and even more advanced trail users. Due to safety concerns, accessing this singletrack trail from the (Wolf) parking lot rather than riding on Tillman Road is great planning to ensure the safety of user groups. I ask the National Forest Service to approve this new trail.
