I'm writing to express my support for the Tillman Trails Connectivity Project on Narrowback Mountain in the George Washington National Forest in Virginia. This area is a tremendous resource for recreation and I've enjoyed seeing the improvements and use over the years. I believe this development should expand and continue. I would like to see more relocations of legacy trails and or new trail construction along the Tillman Road Corridor. Improvements should include more trails and better trail connectivity in the North River District. The Narrowback Mountain trail system is a fantastic route for intermediate and beginner trail users. The proximity of the trails near the forest boundary makes this system very accessible to users. Personally, I've enjoyed the Narrowback trail system as a place to exercise for improved health and mental stability through mountain biking and hiking. It's also a great place to introduce children to forestry and outdoor recreation. I believe additional trails connecting to the Wolf parking lot will increase safety in the area by eliminating foot and bicycle traffic on Tillman Road. Please consider approval of this project. Thank you.
