Comments:

I support the project and would like to see more relocations of "legacy" trails and or new trail construction along the Tillman Road Corridor. Keep us MTB off Tillman road which there are many drivers that drive way to fast and drink and drive on that road. The GW trails in the North River District are increasingly popular and have seen an influx of use over the past years. Since Covid there has been another increase of trail use bc of social distance. The trails can also be used as fire borders. Trail work will help keep debris down.
